

# HIRING TASK (Full Stack)

**Tech Stack:** MERN (MongoDB, ExpressJS, ReactJS, NodeJS)

**Deadline:** 25 AUG, 10pm

## Task 1: Create UI

## Task 2: Build API

- Create API : For creating tweet it includes data (name, pic, date, post description, like, comment, share count).
- GET API : For getting the tweets user published.

## Task 3: Integration of API

- Integrate above API so user can create & view tweets.

## Guidelines:

Use best practices for code architecture.

Follow MongoDB best practices and design principles while keeping scalability in mind.

Write clean and well-architected code.
